SPT-5 COPPER

SPT-6 OLIVE

Application

The Landscape Spotlight incorporates the ease of installation, appeal and durability that has become the hallmark of TLD products. With six housing options and a full complement of light intensities and optional light dispersion angles, the Spotlight provides weatherproof focus as well as special effects for pillars, columns, plantings, signs etc, providing limitless opportunities for beauty and character that lasts.

Configuration

The Spotlight is available in a choice of six housing options with varying wattages, light diffusion angles, and three attractive finishes. Fixtures utilize 3000K light color and come with a ground stake.

Electrical/Connectors

Landscape Spotlight fixtures are constant voltage and utilize 24v DC regulated power supplies, allowing more light with less power in longer runs, ideal for landscape application.

Power Supplies, Dimmers and Accessories

We offer a variety of low voltage 24v DC regulated power supplies suitable for use with the Tara line. Outdoor installations require use of our outdoor rated power supplies and accessories, providing all-weather protection. Wireless dimming is available as an option.

Warranty

Fixtures are rated for 50,000 hours at 70% of lamp lumen output and backed with a 3-year limited warranty by TLD, an innovative leader in LED technology.
